

Offer 383111

GUOWEI 115 F from 2026

Paper Guillotine

Offer Details

Offer Number	383111
Brand	GUOWEI
Model	115 F
Manufacturer	GUOWEI
Condition	New
Year	2026
Incoterm	Free On Board
Cylinders Condition	
Under Power	No
Still in production	No
Test possible	No
Complete and in working condition	No
Availability	30 Days
Counter	
Machine number	

Description	<p>The F1 model represents the most advanced configuration in our guillotine range, combining high-precision cutting technology with intelligent digital workflow integration. Equipped with a sophisticated computer control system capable of communicating with external devices and networks, it allows cutting jobs to be prepared and transferred remotely, significantly improving efficiency, automation, and production management. This is currently our most complete and innovative solution. The guillotine is fully compatible with CIP4 standards, enabling seamless integration with modern print production environments through advanced data exchange and workflow automation systems. It features Japanese digital servo control technology and a 22-inch full-color touchscreen display, offering outstanding precision and ease of operation. The dual hydraulic system ensures maximum cutting stability and performance, while the positioning accuracy reaches 0.01 mm. The intelligent control system includes automatic fault self-diagnosis, real-time operating status display, dynamic cutting visualization and tracking, up to 1,000 programmable job groups, more than 100,000 programmable cutting positions, and a backgauge speed from 8 to 30 meters per minute. The powerful computer operating system provides extended memory and storage capabilities, with data retention exceeding 300,000 hours, and includes self-maintenance and system monitoring functions for long-term operational reliability. Only premium international components are used throughout the guillotine, including hydraulic components from Italy, electrical components from France, Germany, Japan, and Korea, high-precision Taiwan ball screws and double linear guide rails, a PLC control system for full monitoring of all mechanical and electrical operations, and imported low-maintenance bearings for durability and reduced servicing requirements. The F1 model also features an automatic lubrication system, automatic maintenance functions, and advanced safety and operational monitoring systems. Designed for demanding industrial environments, the F1 model delivers maximum productivity, precision, automation, and long-term reliability.</p>

Technical details

Cutting width	115 cm
Max. cutting height without assistance by pressing the plate	16,5 cm
Max. cutting depth	115 cm
Minimum cutting depth without assistance by pressing the plate	2,5 cm
Extended work table length	73 cm
Height of work table	88
Machine width including side worktop	266 cm
Total length of work table	226 cm
Cutting speed	45 r/min
Max. Paper pressure	40.000 n
Main engine power	4 Kw
Paper feed motor	0,75
Air pump	0,75 Kw
Machine weight	4.000 Kg.
Overall dimensions (length x width x height)	255 x160 x 215 cm
Monitor touch screen	22"
Programs	1000
Time of delivery	30 Days
Ce Certification	Yes

Warranty	1 Year
Made in	China

PRICE: Upon request
